To Whom it May Concern:

It is with great pleasure that I am writing this letter to recommend Andrew Whitehead as a great addition to any organization and with confidence can say that he would exceed your expectations.

My name is Sonia Lutarewych and I am the President at SteriZign Precision Technologies., LLC. I had the distinct pleasure of working with Andy when SteriZign was contracted to design and manufacture three custom sterilization trays for ACTIV Surgical. Our process together included sterilization tray and packaging design development, branding development, labeling, package and shipping integrity testing and quality assurance documentation development. The packaging designs were elegant, eye catching and brilliantly exhibited the ACTIV Surgical brand image while optimizing the product cost. Andy received compliments on the packaging design from both the ACTIV Surgical marketing and sales teams.

Andy was always candid and demonstrated the utmost integrity with all our business transactions. He is a very creative and detail-oriented design engineer. Andy was always willing to help solve problems with clever solutions. On one occasion, he stepped up to help us solve a label inspection issue by recommending an optical character recognition software program. This program compared the labels and provided discrepancies to help minimize potential for operator errors. This program allowed our team to verify that all printed labels matched the approved label from our customer sign off package. We are currently exploring this idea as a continuous improvement process.

I am pleased to provide this recommendation letter for Andy Whitehead, who I believe without any doubt will be an excellent addition to any engineering team.

Warm Regards,

A handwritten signature in blue ink, appearing to read 'Sonia Lutarewych', with a long horizontal flourish extending to the right.

Sonia Lutarewych
President
SteriZign Precision Technologies, LLC
74 Orion Street
Brunswick, ME 04011

Our mission is to be a respected provider of high-quality customized prototypes and products that are delivered on time and error-free the first time. We accomplish this by applying our vast experience, ethical standards, professional passion, communication skills and collaborative relationships to maintain a quality system that provides our best work to the customer, every time.
